

# De-Risking Water Management

OWM Group is the global authority for fully integrated Potable Water Management services including consultancy, compliance, products, training, advisory and support to the Energy and Marine sectors.

With over 11 years' experience in the industry, we set new standards for critical and safe water operations through our full pot water system cleaning and disinfection service to ensure the safety of your workforce in full compliance with statutory requirements.

“Fresh Water Storage Tanks must be opened up, emptied, ventilated and inspected, thoroughly cleaned, recoated as necessary, aired and refilled with clean freshwater chlorinated to a concentration of 0.2ppm free chlorine. The cleaning process should include disinfection with a solution of 50ppm chlorine”.

Marine Labour Convention 2006

## Benefits

- ✓ Reduced time with spray disinfection method
- ✓ Industry leaders deliver 'right first time'
- ✓ 24/7 global support
